

Minutes for STAMINA Workshop with Stakeholders

Part III

The third stage of the Romanian workshop took place during the Romanian TRIAL.

General topics presented in Romanian Workshop

-STAMINA Project presentation;

-scenario developed for the Romanian trial running;

-presentation of the 10 IT tools (SmarKo, WSMA, FACS, DMHT, EWS, ENGAGE, CHARM, CrisisHub, EMT, PPT), offered by STAMINA project and selected by IVN-Ro for the national pilot (trial);

-gathering the opinions of Romanian specialists involved in the activity of surveillance and control of communicable diseases and management of medical crisis situations through discussions on the topics presented, as well as through questionnaires developed by the IVN team for the evaluation of the STAMINA tools.

Based on the presentations, fully supported by members of the IVN team, the participants formulated questions to clarify specific aspects and, following the discussions, they proceeded to complete the questionnaires drawn up by the IVN partner for each instrument subject to the trial testing, with the aim of gathering information useful and approved for an objective evaluation of them. It should be noted that during the discussions the participants were interested in the way and form in which information is transmitted between the different instruments, the type of information that is transmitted, the possibilities of communication between the different authorities involved in the process of managing medical emergency situations.

In the STAMINA project, the IVN team was involved in 6 of the 9 WPs (WP1, WP2, WP4, WP7, WP8, WP9), in which IVN regularly participated in the weekly/bimonthly meetings organized by each WP leader.

Other subjects presented in Romanian Workshop

- A. IVN's involvement in the STAMINA project
- B. Key performance indicators for assessing a medical crisis
- C. Roles, functions and responsibilities in the Romanian TRIAL
- D. Training of the actors involved in the management of a pandemic
